

## **Machinist**

Noble-X, Inc is seeking a machinist with a primary focus on Mills for our growing companies. We offer a clean, safe environment, excellent pay, 5 weeks paid leave time, 1 week sick leave time, 2 weeks paid company shut down along with a competitive benefits package including health, dental, life, short-term disability, and long-term disability insurance, 12 weeks paid leave for the arrival of a child, and a 401K match.

### **Purpose**

The primary duty of this position will be to perform mill setups, program interpretation, and machining in a production capacity along with other related tasks. These tasks will include working with QC and engineering on prints, manipulating programs for machining of parts, setting up the mills, proving out setups, assisting operators, production machining of job shop work, and other duties as assigned.

### **Essential Duties and Responsibilities**

- Work with engineering, QC and production to establish and maintain efficient manufacturing processes and lead times.
- Read and interpret customer supplied blueprints, create process prints, internal work instructions and job processing travelers.
- Setup and/ or assist operators with setups.
- Troubleshoot setup issues and offer your understanding of the fix to the operator.
- In-Process inspection of parts and monitoring of processes to ensure parts adhere to the company's standards and exceed customer expectations.
- Document final setup procedures and maintain future improvements of programs.
- Machining of low volume and custom, one off job shop work.

### **Qualifications/Requirements**

- Understanding and ability to edit G and M code.
- Skills and related experience in complex component manufacturing processes using mills.
- Experienced understanding of machine controls (Haas, Fanuc, etc.).
- Experienced understanding of print reading and of GD & T.
- Awareness of cutting tool technology and terminology.
- Experienced understanding and awareness of measurement tool usage (Gage pins, calipers, micrometers, etc.)

### **Education/Training/Experience**

- 2-5 years of related experience
