

Structural Steel Detailer

Noble-X, Inc is seeking a structural steel detailer for our growing companies. We offer a clean, safe environment, excellent pay, paid leave time, sick leave time along with a competitive benefits package including health, dental, life, short-term disability, and long-term disability insurance, 12 weeks paid leave for the arrival of a child, and a 401K match.

Essential Duties and Responsibilities

- Perform layout and shop drawings for steel structures from customer design drawings.
- Prepare installation instructions and assembly instructions for shop cutting, punching, and related operations.
- Use computer software programs to design and draft.
- Provide erection and fabrication for structural steel projects.
- Assist production with any questions.
- Help develop detailing standards.
- Perform and schedule on-site field measuring as needed for each project.

Qualifications/Requirements

- AutoCAD based detailing program or similar program experience.
- Ability to visualize how elements fit together when working with drawings.
- Good written and oral communication skills. Ability to effectively communicate in person and on the phone with co-workers and customers.
- Good organization skills and ability to multi-task to meet deadlines.
- Willingness to go beyond typical duties to assist co-workers and customers.

Education/Training/Experience

- Related trade school or secondary school program
- 2-5 years of related experience
