

New Stainless Steel Drink Rail from Pure Steel Solutions – Built for Decks, Designed for Hosting

Wabasha, MN — April 2, 2025 — The Noble-X family of companies announces the launch of PureSteel Solutions, a new brand offering premium stainless steel railing products to the market.

Thoughtfully engineered for both style and strength, the railing is a statement piece that transforms everyday decks into exceptional outdoor spaces. Crafted from high-quality stainless steel, these drink rails are built to withstand the elements while showcasing a design-forward look. A subtly raised back edge adds functionality—helping to keep glasses and items securely in place. Clean lines and a sleek profile complement a range of architectural styles. Designed to fit standard 2x6 deck rails, the system is also available in custom sizes to meet unique project specifications.

This product line reflects the Noble-X commitment to craftsmanship and precision. Our foundation is built on decades of stainless steel machining, welding, and fabrication expertise. Our work in the construction industry, including our asphalt rolling machine division, demonstrates the same level of engineering excellence now applied to the PureSteel Solutions railing system. Manufactured in Minnesota and Wisconsin, each rail is crafted with attention to detail.

Key Features:

- Constructed with Premium Stainless steel for long-lasting performance and a high-end finish
- Designed with a raised back edge to keep drinks and other items in place
- Created to fit over standard deck rail dimensions, with custom sizing available
- Engineered for easy installation and adaptability to unique projects
