

Full-Service CNC Machine and Fabrication Shop

MACHINING

Our modern CNC machining centers can handle multiple materials and hardness over 60 rockwell. We utilize our decades of experience and up-to-date technology to provide tight tolerance parts.

TURNING

Noble-X offers precision cylindrical turning up to a 78" diameter or to a 12' length. Our Swiss lathes ensure a high level of precision and production paired with a 12' bar feed capacity.

GRINDING

We offer surface grinding of flat plates up to 32" x 78".

CASTINGS

Noble-X partners with a local foundry and provides precision machined castings.

EDM

For difficult contours, Noble-X offers Electric Discharge Machine services. We have Wire EDM and Sinker EDM machines.

WELDING

We provide comprehensive welding services, from factory maintenance and heavy equipment repairs to production welding with stainless steel, carbon steel, aluminum, and other alloys.

STEEL FABRICATION

We can cut, form and weld sheet metal and plate to fabricate parts to your specifications.

LASER CUTTING

Our 5-axis lasers achieve tolerances up to $\pm .005"$ and cut material thicknesses up to $.125"$.

MILLING

Our milling capability is up to 14 ft. With 4th and 5th axis machines, large horizontal and bridge mills, Hudson offers a variety of milling solutions.

FOOD GRADE MACHINING

We machine high-quality stainless steel parts used in food processing and packaging.

FIXTURING

We help customers find a solution for their complicated fixturing projects, including difficult-to-hold parts.

HEAT TREATING

We heat treat prototypes and small runs. As a full-service CNC machine shop, we partner with local heat treaters for larger jobs to provide finished parts.

RESIDENTIAL STEEL PRODUCTS

We fabricate and install balcony and stair railings, pergolas, clear span beams, and steel moment frames for large walls of windows.

INSPECTION

We offer full inspection services utilizing a variety of precision test equipment including Coordinate Measuring Machines.

DESIGN & ENGINEERING

Our in-house team of production designers and engineers are here to work with you to take your idea from drawing to a fully functioning product.

ADDITIONAL SERVICES

We provide sand blasting and industrial painting services. We coordinate other processes, such as high-volume heat treating, coating and engraving.
